HYDRANGEA macrophylla 'Hovaria® Holibel'

After a few months at the head of BOOS, I am pleased to present to you, with the help of the team our new offer for the season 2011/2012.

In respect of Didier Boos mind, we want to show you the diversity and the potential of Hydrangea and Hortensias for pot flower, Garden and Landscape decoration.

This new catalog includes more informations and pictures. We hope that it will help and inspire you. You can also complete your knowing of Hydrangea by visiting our website, and a tour of our garden and production.

All the team will be happy to welcome you.

Good sales season,
 Jean-Paul DAVASSE

► **Our facilities : Specialized and adaptability**

4,5ha container nursery
 Greenhouses and poly-tunnels : 5000 m2
 Cool Fridge : 2500 m3
 We do all the growth's stages from cuttings to flowering pot or landscape specimen. These experiences and technics provide us solutions to help you in your growing or planting choices.

► **Our Range : best sellers, innovations and customized solutions**

We maintain a large genetic collection of more than 400 varieties, approved by the French foundation CCVS. With the help of breeders partnerships we introduce regulary new plants in the market. All the new varieties received are tested both in garden and production conditions, to secure and choose the best one's. Knowing the flowering pot and garden market, we propose our varieties in different size and pots to give you the best choices.

► **The team : service and quality for your success**

Information for choice, special growing planning, customized production : we can help you at all the stages. Specialized in the green industry for a long time, we have integrated that your success require quality from plant to delivery.

300 000 plants grown per year
 50% for flowering pot market / 50% for garden market

Delivery : 80% France, 20% export

More than **400** varieties ,
 world breeders partnerships

HYDRANGEA macrophylla SELECTION

► Pot flower varieties

We receive each year different selections from the best world breeders. We test them from propagation to finished flowered plants. We choose only those that have technical benefits or could create new decoration. Our goal :

Offering you a high value hydrangea's collection

HYDRANGEA

BOOS SELECTION

garden varieties

We have tested in our garden for 15 years more than 400 varieties. This long time work give us ideas and knowing about the qualities of each variety, both for nursery and landscape. We propose to you a selection of this work. We can also grow in limited quantity historic or rare varieties, please ask us about availability.

Ideas and solutions for patio and Garden.

Hydrangea arborescens

Small shrub 1 to 2m high, bushy growth, suckering shoots, extremely hardy (-30 to -35°C), with ovate deciduous green leaves. Origin :East USA. Flowers in corymbs in succession from July to September on the year's shoots.

Require plenty of moisture and good drainage, prefer some shade, support morning's sun. Prune severely each year or keep 1/3 shoots light pruned to promote a longer flowering period.

Annabelle

Colour	White
Size	2 m
Bloom. period	July

Size	2 m
Bloom. period	July

THE HARDIEST

Hydrangea paniculata

Small or large shrub, from 1m for the compact varieties, up to 3m for the biggest. Extremely hardy (-35°C). Origin : China and Japan. Deciduous ovate dark to light green leaves. Terminal panicle flowers with a mix on sterile and fertile white florets (some varieties has only sterile), from June for the earliest varieties, normally from July to September. For some selections, the white colour fade to pink and red with low temperature in end summer. Support light drought and some chalk, support sunny situation except in hot and dry countries or situation. Prune severely each year (except for the earliest varieties which require only old dry flowers pruning) or keep 1/3 shoots light pruned to promote a longer flowering period.

also available : 'Phantom' with giant flowers and 'Kyushu' with delicate flowers.

Hydrangea macrophylla

Shrub, bushy growth, variable size : 1m for the compact to 2.5m for the highest. Good hardiness (-20°C to -25°C), some varieties are more hardy (up to -35°C). Origin : Korea and Japan. Big deciduous green leaves. Flowers buds on the last season shoots, some varieties are able to bloom on lateral year's shoots or base shoots (see description). Lacecap or mophead flowers from July to September-October. Require plenty of moisture and good drainage. Prefer some shade, some varieties support morning's sun. Prune the old dry flowers in spring, and possibility to prune hard the oldest shoots.

INFO
The varieties not illustrated herein in pot flower varieties.

Hydrangea serrata

Small shrub up to 1.5m for the biggest varieties. Bushy growth. Hardiness depending from varieties, normally -20 to -25°C. Origin: Japan and Korea. Deciduous ovate to lanceolate dark green leaves, fading to red in autumn or sunny situations. Flowers buds on the last year's shoots, some varieties blooms also on lateral and base year's shoots (see description). Lacecap or mophead flowers from June to September-October. Require plenty of moisture and good drainage. Prefer some shade, some varieties support morning's sun. Prune the old dry flowers in spring, and possibility to prune hard the oldest shoots.

HYDRANGEA GARDEN

Climbing Hydrangea and related species

Climbing shrubs, attaching themselves to trees and walls by means of aerial shoots. Origin : Nepal or South America. Hardiness good for the deciduous species, the evergreen species or varieties support -10°C to -15°C when they are old. Blooms on the lateral non-climbing shoots, lacecap flowers in May-June. Prefer north or north east situation, or a shady wall. Support atmospheric pollution. Prune only to limit the development.
